

Marine Institute - Space Poll Comments

- the cona students take up all the tables in the current available study area during the day
- To have Graduate Study rooms available similar to those of the QEII library
- Make more computers available for the students of the Marine Institute. Also the ones that are available should be working most of the time due to regular technical checkups.
- close off the wide open space in the silent area to cut down on noise.
- comfortable reading chairs and couches.
- "Provide different spaces: Space for quiet when I want quiet ; comfortable reading with conversation when I browse newspapers or magazines
- Tables/desks not tiny carrels
- wireless access for computers and internet
- Have some quiet spaces with no white noise. The 2nd floor of QEII is SOOOO noisy with all the machines and people. That noise filters up to the 3rd floor too. I don't need study carrels, but I do need somewhere I can "get away from it all
- larger spaces for individual study (e.g. bigger than a carrel) which are optimized for laptop use
