

**Quick Poll #3:  
What is your primary reason for visiting the Library today?**

**Comments**

---

Great work! I can't think of a more helpful staff and library in general.

The library is a great place to study. Longer hours of operation particularly on the weekend's would help.

The off campus login feature is great. It really is a time saver. Instead of having to go to the library, I can do a lot of work from home, and know exactly what I need to get when I get to the library.

good book service for Distance Ed students!

I've never used the letter classification system before - looking for books seems confusing and overwhelming

I appreciate the library staff at QE II because they are always so helpful and kind. Thank you.

the library is an awesome place to interact with fellow students. In addition the great selection of books the library has to offer keeps me on my toes to say the least lol. Great library! LOVE THE STAFF! The girls at the study room sign in desk are the best in the world. Keep it up qe11!

i am investigating your website for an online course at langara college in Vancouver. someday i hope to do research at your library into the history of the Irish in Newfoundland.

Today I used the library to sign out some reserves, but I just wanted to let you know that I use the library for most of the things on the list in #3. One thing that in the list that I don't use the library for is for socializing because there are many other places to do that. For me, the library is a quiet and comfortable atmosphere where I can do my work, with all the resources right at my finger tips! To everyone who has a role in running the library, Great Job!!!

I am currently waiting for a book to be placed on reserve. It has been delayed somewhat which is very frustrating as I am falling behind on my readings. My prof placed her readings on reserve Tuesday night and it is not available yet,

(Thursday, 12pm), although it has been confirmed that it is in the possession of the library. I have found the staff to be very much less than helpful on this matter, telling me that it would be available by five o'clock yesterday and then when I drove to campus at 530pm to take it out, it was still not available. Very frustrated!

My reason was to attend a meeting. I also took the opportunity to look for a book in the stacks.

I think Distance Plus should be added to your "What is your Branch" question. I'm here today to access e-journals from home.

The library is being used way too much as a place to meet and socialize with friends. Library staff/ Mun cops should really monitor the people (especially on the third floor) up there who are just hanging out and making unnecessary noise and kick them out if need be.
